## General Description:

The Electro-Voice ® SxA360 sets a new standard for powered speakers. Its design provides the user a simple to use system with plenty of power in very compact, lightweight, attractive package.

This is a full range loudspeaker ideal for most applications requiring high-quality sound. The SxA360 offers a unique combination of high SPL, natural frequency response, and dynamic headroom in an extremely lightweight package. Its linear response provides excellent feedback-free sound without additional equalization.

Built-in suspension points and pole mount make it easy to position for your application without expensive accessories.

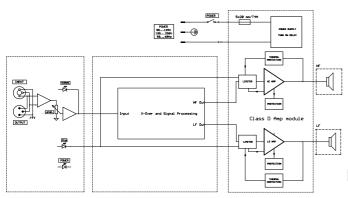

The high-frequency section of the SxA360 utilizes a molded-in, 65° x 65° constant-directivity horn. This unique pattern contributes to high intelligibility, vocals sound natural yet "cut through" in reverberant, noisy rooms. Coverage pattern is uniform, sound quality off-axis is very well maintained, even at 45° off axis (a 90° total coverage angle). The SxA360's high-frequency horn is driven by the DH2T, a one-inch-throat, wide-bandwidth, titanium-diaphragm driver using a unique, convex-drive TimePath  $^{\rm TM}$  phasing plug structure (U.S. Patent #4,525,604) for smooth and extended high-frequency response.
